Special Seminar

Wednesday, January 18
12:15pm; Building 380, Room 383-N

David Kazhdan
(The Hebrew University of Jerusalem)

“Basics of BV-integration”

Abstract:

The differential geometry of supermanifolds is completely analogous to the usual differential geometry, but the theory of integration is very different. I'll remind the basic definitions of the theory of super manifolds and explain the set up of the integration.
